

CIP Enhancement Plus a Whole Lot More

62-174/326 Air Blow Check Valve

Application

Alfa Laval®'s Tri-Clover® brand Air Blow Check Valve is designed to (1) evacuate lines of product or CIP solution and (2) for air agitation of product in tanks and other vessels. It also helps to protect pipelines against corrosion – air drying of lines permits formation of protective oxide film . . . the key to placing a system in its most corrosion resistant condition. Improves product uniformity and quality – product air agitation thoroughly mixes and blends product.

Standard Design

- Fail Safe Operation – backflow of product or CIP solution prevented by simple air to open, spring to close operation.
- Easy Assembly/Disassembly – Tri-Clamp® connections permit quick disassembly and assembly for replacing Filter Media, cleaning or inspection.
- Remotely Controlled – can be remotely controlled by controlling the supply of air to the valve.
- Rugged Construction – type 316 stainless steel is standard. Spherical plug assembly is bonded EPDM rubber.
- Conforms to 3A Accepted Practices – for applications requiring a final filtering of air prior to entering tank or pipelines.

Working Principle

Filtered air enters adapter (A) and exerts pressure on the valve plug assembly (B) causing it to move forward and unseat. The filtered air passes through the valve and around the valve plug assembly (B) entering the pipeline or tank. When the air pressure entering the adapter (A) is shut-off the valve plug assembly is returned to its normally closed position by return spring, preventing any product or CIP solution backflow. The Air Blow Check Valve can be used in any position, horizontal or vertical.

62-174 and 62-326 Air Blow Check Valves

The Air Blow Check Valve is easily installed on tanks or other vessels, for product agitation, by using a Tri-Clamp, a gasket, and a mounting ferrule. No other fittings are required. To use the Air Blow Check valve to evacuate lines of product or CIP solution it is recommended that it be clamped on the end of the “Y” branch of a Ball Check Valve then installed in the line. See page 3 for illustrations of typical installations.

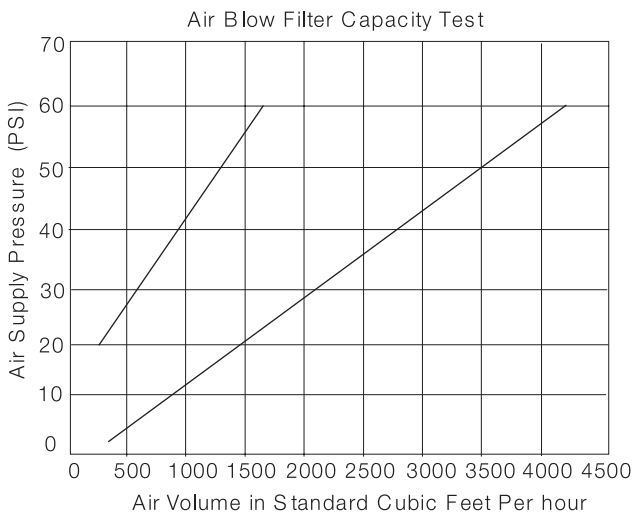

Dimensions (inches)

- C = Adapter
- D = Filter disc
- E = Clamp
- F = Valve body
- G = Stainless steel perforated disc and buna gasket
- H = Washer
- J = Spring
- K = Stem guide
- L = Plug assembly

Connection Size	A-OD (inches)	B-Overall Length

Variety of Adapters Available

Adapter Type	For Model 62-174R	For Model 62-326
 <p>"A" Adapter - For Air Line Quick Coupler</p>	(A) #37-80	(A) #37-161
 <p>"B" Adapter - For 1" ID Rubber Hose</p>	(B) #14MPHR-1-S	(B) #14MPHR-2 x 1-S
 <p>"C" Adapter - For NPT Female Connector "C1" Adapter</p>	(C) #23BMP-1½ x 3/8-S 3/8 NPT Female Connection (C1) #23BMP-1½ x ½-S ½ NPT Female Connection	(C) #23BMP-2 x ¾-S ¾ NPT Female Connection

Replacement Media Ordering Information

Item	For Model 62-174R	For Model 62-326
 <p>Filter Disc (fits all sizes)</p>	Order #FA-1½-30C Sold 50/pkg. .3 MICRON	Order #FA-2-30C Sold 50/pkg. .3 MICRON
 <p>SS Perforated Disc and Buna Gasket</p>	Order #FAD-1½-01 Sold in Single Units	Order #FAD-2-01 Sold in Single Units

Note!

The Air Blow Check Valve must be used with a Filter Disc (Not furnished with unit). These filter discs are available in packages of 50.

Typical Installations of Air Blow Check Valve and Disposable Air Filter Media

(62-156A-SIZE) includes 45BY and air blow assembly

For Air Blowing Pipelines - Used with Tri-Clover's ball check valve # (45BY-Type Connection-Size) for pipeline evacuations of product or C.I.P solution.

For Product Agitation in Tank or Vessels

Technical data

Pressure rangeVaries based on style of clamp used. Contact Alfa Laval.
Temperature range20°F to 284°F
Air pressure8-10 PSI minimum

Materials

Product wetted steel partsAISI 316 stainless steel
Other steel partsAISI 304 stainless steel
Product wetted partsEPDM
Other sealsBuna

Options

Equipment

- SFY molded elastomers
- Air fittings - Air quick coupler
 Hose barb
 NPT tapped hole

Ordering

Please state the following when ordering:

- 62-174 (low volume)
- 62-326 (high volume)
- Tri-Clamp mounting connection size
- Type of air connection
